

KEEP OUR CHILDREN SAFE

**EPI-ACCESS
International Inc.**

In September 2004 a tragic event occurred at an Ontario school. A 13 year old girl died from anaphylactic shock. As a result of this tragedy the Government of Ontario passed a Bill (Bill 3) called Sabrina's Law. **This Bill requires that every school board in Ontario establish and maintain an anaphylactic policy and that every school principal maintain a file and develop an individual plan for each pupil who has an anaphylactic allergy.** This must include, among other things, details on the type of allergy, monitoring and avoidance strategies, appropriate treatment, a readily accessible emergency procedure and storage for epinephrine auto-injectors where necessary.

**EPI-ACCESS International Inc.
has created a storage case that
meets these criteria.**

**Let's keep our
children safe and
educate everyone on
the importance of the
case and its contents.**

**Be prepared
with EPI-ACCESS
International Inc.**

This unique product is designed to store up to 8 epinephrine auto-injectors along with an area for photo identification, type of allergy and prescription details. Its bright colours make it easily identifiable when displayed on a wall in the classroom, principal's office, the administration office, daycare, etc.

Prompt action is the key element when faced with such extreme emergencies. Completely transportable, lightweight and versatile, it can also accommodate asthma pumps and other medication that does not require refrigeration. Ideal on field trips, outings and at camp.

Also available is an individual epinephrine auto-injector storage pouch with an area for photo identification and emergency contact. This pouch can be worn on a belt, clipped onto a backpack, hockey bag, purse, etc. Made in the same distinct colours to maintain consistency.

EVERY SECOND COUNTS

COULD YOU SAVE A LIFE WHEN EVERY SECOND COUNTS?
